B.S in Human-Centered Design & Engineering

GPA: **3.62** Major GPA: **3.95** Dean's List Recipient Washington State Opportunity Scholar

Leader of the Sony Home Theater platform; presenting the excellence of Sony products to customers for brand loyalty. Expert in the user experience of every Sony television/audio system from this year's model. Generated **\$80,000+ in revenue** for the company in just 21 days through sales. #1 Home Theater Advisor within the store in revenue, memberships, and customer relationships.

Making design decisions for an internal business management tool (SaaS) called **oRooster** through usability testing. Provided email template designs for clients at Microsoft within the Azure DevOps **Team**. Identifying overall opportunities for user experience development and proposing solutions.

Designed and prototyped a synchronous engagement platform for Reddit. Utilized a mixed-method approach for user research, analyzing data from a broad user group. Created a high-fidelity prototype to present to stakeholders and earned **Best in** Communication within the Undergraduate Department.

Led **90 students** in and out of class, as well as providing feedback on assignments. Reinforced Python lecture material with class lab time and personal office hours, **7 days/week**. Minimized assignment errors and provided feedback on upcoming assignments by testing the assignments before release.

Designed and published company website through a CMS. Conducted competitive analysis, and user testing of low and highfidelity prototypes. Digitally hand drew all logos for service section of website on Procreate. Onboarded client to confidently modify website tailored to future needs. Attracted 200+ unique visitors and generated +\$15,000 in revenue in the past year for the client.

Movement: designed a mobile application that encourages Cancer Care Unit patients at the **Seattle Children's Hospital** to remain physically, mentally, and emotionally motivated. Researched adolescent psychology on motivation and gamified the app as a scavenger hunt to encourage patient's proactivity.

Fully redesigned and built a high-fidelity prototype of the Coding with Kids website on Adobe XD and Figma to improve the registration and course discovery for parents and children. Course registration was forecasted to increase by 25%. Our team of five took 1st Place for this track.
