Tools + Tech

Figma, Adobe XD, Sketch Adobe Creative Suite Microsoft Office HTML5, CSS3 Java, Python, Javascript, React Rhinoceros 3D, SOLIDWORKS

B.S in Human-Centered Design & Engineering

GPA: 3.66 Major GPA: 3.95 Dean's List Recipient Washington State Opportunity Scholar

Generating user-friendly content for sites. Making design decisions based on user journey map analysis. Creating and implementing portals and dashboards for company product. Identifying opportunities for user experience development and propose solutions. Working with software development team to address technical and functional aspect of each projects lifecycle.

Assisted **90 students** in and out of class, as well as providing feedback on assignments. Reinforced Python lecture material with class lab time and personal office hours, **7 days/week**. Minimized assignment errors and provided feedback on upcoming assignments by testing the assignments before release.

Designed and published company website through user research, competitive analysis, and user testing of low and high fidelity prototypes. Digitally hand drew all logos for service section of website on **Procreate**. Onboarded client to confidently modify website tailored to future needs. Attracted **112+ unique visitors** in the past year.

Designed a new website for the University of Washington College of Engineering through iterative user research. Prototyped four main sections in the website on **Figma** to better organize the information architecture to support user's needs: Event Calendar, Placement Information, Clubs, and Academic Support. Projected to increase site visits to **4+times/day**.

Step-It-Up App Project: designed a mobile application that encourages Cancer Care Unit patients at the Seattle Children's Hospital to remain physically, mentally, and emotionally motivated. Researched adolescent psychology on motivation and gamified the app as a scavenger hunt to encourage patient's proactivity.

Fully redesigned and built a high-fidelity prototype of the **Coding with Kids** website on **Adobe XD** and **Figma** to improve the registration and course discovery for parents and children. Course registration was forecasted to increase by **25%**. Our team of five took **1st Place for this track**.
